Rohan Chavan

RC Architects

Rohan is an architect and designer based in Mumbai, known for his innovative approach to urban design, public sanitation, affordable housing, and institutional projects. Since founding his practice in 2015, he has developed a unique design style that blends modern materials with vernacular patterns, creating spaces that emphasize natural light and integration with the landscape.

Rohan's work has been featured at prestigious international exhibitions, including the Urban Spirit Conference in Beijing (2018), the London Design Biennale (2020), and the Triennale de Lisboa (2022).

Rohan believes that "Architecture as a science emerged from man's humble need for shelter. A home is the purest form of design. However, modernized the skin, the spirit of a home is its timelessness, where architecture transcends fashion. Beyond a room with a sturdy wall, a roof, a window, and a hearth, all else is luxury"
